

The Fire Continuum Conference: Preparing for the Future of Wildland Fire

*Presented by Association for Fire Ecology and
International Association of Wildland Fire*
The University of Montana, Missoula
May 21-24, 2018

PREPARING FOR THE FUTURE OF WILDLAND FIRE
MAY 21-24, 2018 • MISSOULA, MONTANA

An Invitation to hold Attached Meetings

In a time of dramatically reduced or restricted budgets, the Association for Fire Ecology (AFE) and the International Association of Wildland Fire (IAWF) recognize that it is difficult for those of us in the fire ecology, research and management fields to justify travel to multiple conferences and meetings and we think that doubling up on travel is a fiscally responsible way to attend professional meetings. We invite groups and committees to hold smaller meetings in conjunction with The Fire Continuum Conference: Preparing for the Future of Wildland Fire to be held in Missoula, Montana, USA, at the University of Montana, May 21 -24, 2018.

Rooms ranging in capacity from 10 to 200 will be available at no extra cost in The University of Montana during the following times:

- Monday Morning, May 21 (during workshops)
- Wednesday after 12:30 pm, May 23 (during optional field trips)
- Friday, May 25
- Tuesday or Thursday Evening (the welcome reception is Monday evening and the Evening Event is Wednesday evening)

Note: Larger rooms are limited so please reserve early to secure your space.

If you are interested in holding an attached meeting in conjunction with The Fire Continuum Conference: Preparing for the Future of Wildland Fire conference, please submit your request here.
